

## Radiography Research Ethics Standards For Europe (RRESFE) Project

The aim of this project is to support the standardisation and optimisation of radiography (medical imaging, radiotherapy, and nuclear medicine) research ethics processes in Europe; make the various regulations more transparent; and offer advice for Radiography researchers in Europe.

Ethics has been granted for this project by the City, University of London, SHS Research Ethics Committee (Reference: ETH1920-0977). Gatekeeper's approval has been granted through the EFRS Executive Board to engage with our members and networks.

The survey will take approximately 15 minutes to complete and we would value your responses by Monday July 5th. The link to the survey is:
